

## **Sprint 1 Report**

**Product Name:** Smart Account

**Team Name:** Smart Account

**Date:** 7/10/18

### **Actions to stop doing**

- The team should stop setting abstract tasks, since it's not efficient for team to implement
- The team should stop discussing too much details on one task, since it's not beneficial for team to complete tasks

### **Actions to start doing**

- The team should schedule a regular group work session, since some techniques are needed to share
- The team should break large tasks into smaller pieces, since with small tasks, team's goal is more clear and direct
- The team should analyze the tasks carefully, since it is easy for team to set its priority
- The team should estimate and add time for studying in tasks, since it takes much more time on learning techniques than actually implementing

### **Actions to keep doing**

- We assign the tasks to each person equally. With the fair assignment, the entire team can focus on their own tasks
- We keep in touch frequently. It's better to track the progress of completion and discuss the techniques and implementation

### **Work completed/not completed**

#### **COMPLETED:**

- US-1 all tasks
- US-2 Task 1, 2

#### **NOT COMPLETED:**

- US-2 Task 3, 4
  - Set up database
  - Data interaction between UI and database
  - Compose each page into a intact program

### **Work completion rate**

- 75%:
  - Most basic UI pages completed but the functions between them haven't been implemented perfectly.
  - Spend too much time on studying techniques and getting familiar with Android Studio
